

## Vision Board

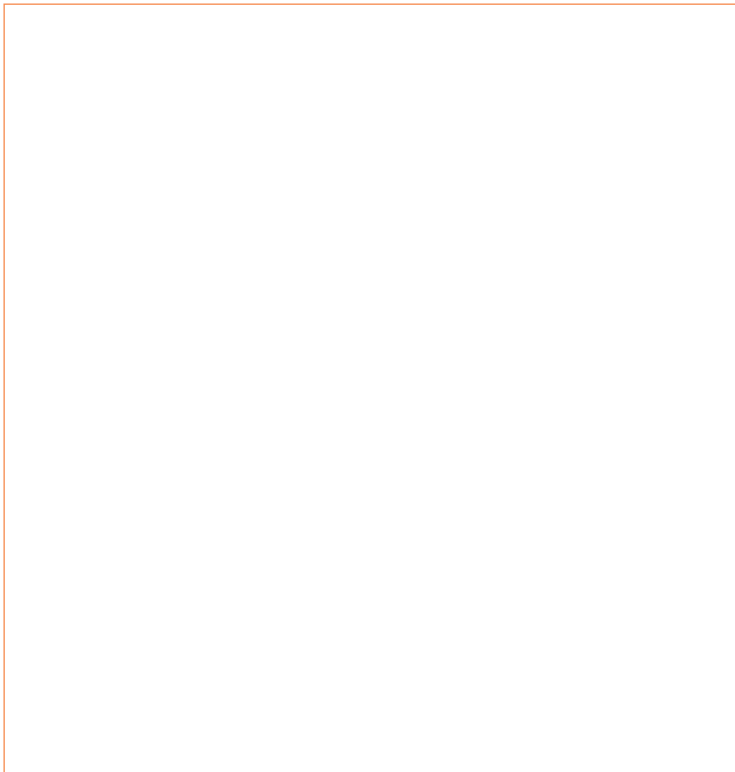

Create a Vision Board to depict a specific future.

What language are you going to study or studying already? By learning the language, how and what will you communicate? Who will you communicate with? And in what situations and contexts will the communication occur in the language? Create the vision in a way that suits you, such as taking and pasting a photo, drawing a picture, or writing on the keyword.

(Example 1) I will make a presentation in English. I will promote my research and discuss it in the academic community.

(Example 2) I will go to Tanzania for research and conduct a survey in Swahili.

(Example 3) I will speak Indonesian to communicate with my colleagues in my seminar and their friends, too.

Key Point:

Studies show that making a Vision Board is effective in achieving your goals.

It is a good idea to revisit your Vision Board regularly.
